PRE-REQUISITE:

- Github. I would advise Github Desktop
- Download the EPSILOMETER library https://github.com/aleboyer/EPSILOMETER.git.
- Matlab 2017 or more

Organize your data:

- Create and run process_MISSION.m in the deployment folder
- I would advise to create your own branch. Then make the changes you Git stash:

```
git stash
git stash apply
```
